

# Ace Data Science Interviews – GitHub Checklist

Here is our carefully curated checklist for the completion of your GitHub profile. Make sure you print it out and keep it handy as you prepare for your interview process!

- ☐ Include at least 3 projects on your profile
- ☐ Add a professional photo – this can be less formal than LinkedIn, but has to be professional
- ☐ Make sure your username is professional
- ☐ Provide latest information about your location, contact details and website
- ☐ Make sure that your profile shows regular commits (the green tiles in your profile)
- ☐ Make sure your projects have self-explanatory names and descriptions. Include Readme files in each of these projects
- ☐ Your code should follow best coding practices around styling and commenting. If it does not, make sure you do that first
- ☐ You have starred important repositories in your area of expertise (for example, Scikit-learn, Pandas, DASK if you are applying for a job requiring machine learning with Python)
- ☐ Contribute to an open source project (Optional – but very high value)
